

Corporate SPACE CAMP® & Spectrum Systems, Inc. to offer “Out of This World” Corporate Development

The U.S. Space & Rocket Center® (USSRC) announces an official collaboration with Spectrum Systems Incorporated to provide client specific training services and corporate development in conjunction with its highly successful Corporate SPACE CAMP® and Corporate AVIATION CHALLENGE® programs.

“Teaming up with Spectrum Systems not only enhances the corporate programs we currently offer, but it also gives us both the vehicle to better serve our clients,” according to Space Camp’s Director of Corporate Programs Michele Leahy.

Spectrum Systems’ services may include a variety of pre-assessment tools and management workshops coupled with the exciting team-building and leadership development training programs offered by Corporate SPACE CAMP and Corporate AVIATION CHALLENGE.

“It’s no longer enough to sit in a classroom and listen to a lecturer talk about professional development. Today’s professionals want to experience it, up close and first hand,” Leahy says. The alliance between the USSRC and Spectrum Systems will create an environment for customized training programs based entirely on the client’s goals. “We’re pleased to be have this relationship with Corporate SPACE CAMP”, says Joe Eng, President and CEO of Spectrum Systems. “Spectrum’s industry and technology expertise with Corporate SPACE CAMP’s unique facilities provide an opportunity for our mutual clients to have what we believe will be an “out of this world” experience and achieve all their objectives and then some.”

Since 1994, and based on the highly acclaimed SPACE CAMP® program, Corporate SPACE CAMP has been changing the way companies view corporate development programs by teaching team members how to reach their peak performance by interacting with each other. The simulated space shuttle mission, flown in one of SPACE CAMP’s scale-sized shuttle simulators, can be tailored to be as demanding as a client desires. The same goes for the state-of-the-art fighter plane simulators available as part of AVIATION CHALLENGE complex located at the USSRC. As a training and a development program, Corporate SPACE CAMP presents a unique approach towards helping some of the leading corporations enhance their teamwork and leadership abilities that are so crucial to their success.

About the U.S. Space & Rocket Center

Established in 1965 by the State of Alabama, empowered by the U.S. Congress and in cooperation with the National Aeronautics and Space Administration, the U.S. Space & Rocket Center is one of the nation's premiere hands-on space science museums, fostering national and international educational outreach programs through its world-renowned SPACE CAMP® and AVIATION CHALLENGE® programs. Located in Huntsville, Alabama, birthplace of America's manned space flight program, the U.S. Space & Rocket Center remains Alabama's top tourist attraction, welcoming approximately 400,000 visitors each year. See USSRC's Corporate SPACE CAMP website for more information, www.corporatecamp.com

About Spectrum Systems, Inc.

Spectrum Systems, Inc. is a technology consulting firm that provides solutions to our client's most challenging business and technology needs. While many will boast of the ability to provide technology resources, we distinguish ourselves by having in-depth expertise in all aspects of the software development process and IT infrastructure: from project management to quality assurance, from distributed architectures to security, from change management tools to middleware infrastructures and much more. We offer a full range of capabilities throughout the IT lifecycle that help our clients to optimize their IT infrastructure and ultimately achieve their desired results. We achieve these goals through the right combination of on-site development, staff augmentation, and outsourcing. Most importantly we achieve these goals by being highly engaged with our customers.
